ALI AHSAN

Data Scientist

Islamabad, Pakistan

Email: ranaaliahsan7860@gmail.com | Portfolio: ali-ahsans-portfolio.vercel.app | LinkedIn: linkedin.com/in/aliahsan08

GitHub: github.com/aliahsan08

EXPERIENCE

Zapply Remote

Product QA Intern 03/2026 – Present

- Improved product quality by testing web apps, job boards, and an autofill extension, hence eliminating bugs
- Enhanced extension reliability by identifying edge cases across browsers and platforms
- Accelerated development cycles by delivering clear, actionable bug reports from structured evaluation

EDUCATION

National University of Science and Technology (NUST) Islamabad, Pakistan

Bachelor of Science in Data Science 09/2024 – Present

PROJECTS

Groove4U - Music Discovery Engine

- Built a music recommendation system enabling users to discover and curate personalized music libraries
- Designed a multi-stage retrieval pipeline: Two-Tower neural network for candidate retrieval, LightGBM reranking with a diversity-aware layer; used Supabase (auth/data) and Qdrant (vector search)
- Achieved HitRate@100: 0.82 and NDCG@100: 0.29 on retrieval across a 90K tracks, 4M interaction dataset

TaxPilot - Tax Intelligence Platform

- Developed a highly accurate context-aware tax intelligence web app for Pakistani regulations.
- Built Agentic AI workflows (LangGraph) with a RAG system over Pakistani tax law (Income Tax Ordinance 2001, Finance Act 2026); Supabase for auth/data, Qdrant for vector search
- Achieved MRR: 0.97 and Precision@5 0.88 based on document retrieval quality.

Hearth – Kitchen Assistant

- Built a RAG based kitchen assistant web app that recommends recipes based on user data and prompts.
- Created vector embeddings using FAISS and utilized keyword matching. Stored recipe metadata in DynamoDB and user data in PostgreSQL (Supabase as backend).
- Achieved Precision@5: 0.93 and Recall@1: 0.96, providing relevant recipes through a user friendly frontend.

SKILLS

- **Technical Stack:** Python, Machine Learning, RAG Architecture, Vector Search, Vector Databases,FAISS, PostgreSQL, DynamoDB, NLP, Data Pipeline Engineering, Statistical Analysis, Exploratory Data Analysis
- **Languages:** English, Urdu

EXTRACURRICULAR ACTIVITIES

Google Developer Groups on Campus (GDGoC) NUST

Co-Lead 09/2025 - Present

- Organized various technical workshops, events, and community sessions
- Led the Finance and HR departments throughout the tenure.
- Collaborated with speakers to deliver industry relevant technical content

CERTIFICATIONS

IBM Data Science Professional Certificate (IBM, Coursera)

- Completed 12-course specialization covering all essential data science skills, including data collection, cleaning, AI/ML, visualization, and analysis.

Supervised Machine Learning: Regression and Classification (Deeplearning.AI, Coursera)

- Gained in-depth knowledge about general mathematics in ML as well as their implementations through various models.
